Python, Java, JavaScript, C

📁 PROJECTS

Alumni Portal, Mini Project ✍

A website built using MERN stack for alumni of different colleges to register as alumni and get in touch with the college and for colleges to track the status of their alumni.

Farm2Market, Hackathon project (Rurathon) ✍

An e-commerce website built with HTML, CSS, Flask and SQL for farmers to sell their products directly to customers and for consumers to buy from the farmers.

Automated Payments, Hackathon project (Virtusa Jatayu)

A way to automate payments using crypto-currency for secure payments. Designed using raspberry pi, RFID tags and reader module. Used ethereum as the crypto-currency and web3 module to handle transactions.

🏆 CERTIFICATIONS

• Ethical Hacking, NPTEL ✍

• Python, NPTEL ✍
